LIFTING EQUIPMENTS Inspection:

Elevator and escalator are gifts of technology for modern life. They are efficient means for passenger and cargo mobility. It is indeed no doubt, that much of the commute and mobility are facilitated by these means. Hence a cautious inspection of these means is prominent. An effective inspection is key to an uninterrupted mobility, and prevent hazardous accidents.

We also inspect:

■ WINDOW CRADLE ■ FORKLIFT ■ CAR LIFT ■ SPREADER BEAMS

LIFTING GEAR Inspection:

IQRA provides a complete range of lifting gear inspection services for both onshore and offshore sectors. We ensure that improved HSE is adhered to and the inspection is considered in accordance to the required and legal standards.

We are well equipped to carry out proof load testing & examination for different lifting gears/devices

We also inspect:

■ SHACKLE ■ WEBBIN SLINGS / ROUND SLINGS ■ CHAIN SLINGS
■ EYEBOLTS ■ HOOKS ■ WIRE ROPE SLINGS ■ RING / LINKS

CRANE Inspection:

IQRA offers an experienced and customized inspection services based on your equipment. Our services include inspection, testing, verification and certification of all sorts of lifting and hoisting equipments. We pride to assist you with an exceptional expertise to conduct a professional inspection of all crane.

- **MOBILE CRANE** ▪ **TOWER CRANE**
- **OVERHEAD CRANE**

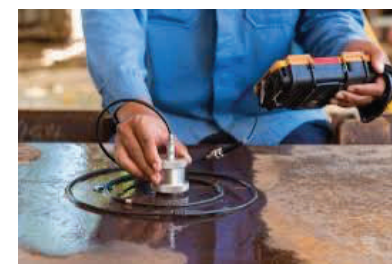

NDT TESTING

Nondestructive Testing (NDT) is a wide group of analysis techniques used in science and technology industry to evaluate the properties of a material, component or system without causing damage. Because NDT does not permanently alter the article being inspected, it is a highly valuable technique that can save both money and time in product evaluation, troubleshooting, and research.

The inspectors in IQRA can offer

- **VISUAL INSPECTION** ▪ **LIQUID PENETRANT TESTING**
- **MAGNETIC PARTICLE TESTING** ▪ **ULTRA SONIC THICKNESS TESTING**
- **EDDY CURRENT TESTING**

We provide NDT testing for Boiler & pressure vessel Pressure vessel inspection, or pressure vessel testing, involves non-destructive tests that ensure the integrity of a new pressure vessel or on previously installed pressure equipment that has been altered or repaired.

In the early days of pressure vessels, many pressure vessels were over-pressurized, and they would explode. This problem was part of why the American Society of Mechanical Engineers (ASME) formed. This body came up with specifications to govern the way pressure vessels are manufactured and maintained. After a pressure vessel moves from its initial manufacturing and testing to its end application, it may undergo alterations or repairs. Whenever something like this happens, the pressure vessel needs to be inspected again to see whether it still meets all requirements.

Also Testing of :

- AIR COMPRESSOR /AIR RECIEVER
- STORGAE TANKS

LIGHTNING PROTECTION SYSTEM

The function of a lightning protection system is to protect structures from fire or mechanical destruction and to prevent that persons in buildings are injured or even killed. An overall lightning protection system consists of external lightning protection (lightning protection/earthing) and internal lightning protection (surge protection). This system need to be visually inspected at regular intervals in accordance with the applicable standards

NDT - THERMAL IMAGING SERVICE

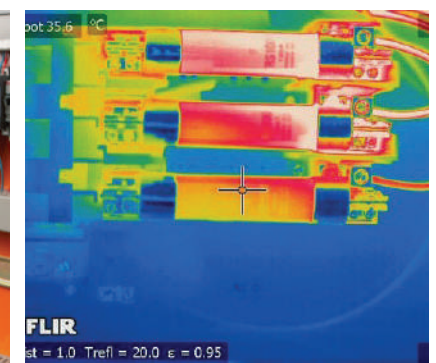

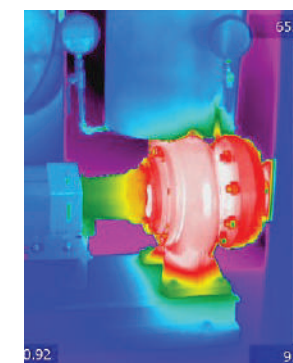

Thermography (thermal imaging) makes it possible to identify electrical defects such as loose connections and over loaded circuits (the most common cause of electrical fires), transformer cooling faults, motor winding faults and induced currents.

We at IQRA provide thermal imaging service for:

- ELECTRICAL ■ MECHANICAL ■ INSULATION

We also provide :

- BASELINE THERMOGRAPHY ■ THERMAL TRENDING THERMOGRAPHY
- COMPARATIVE THERMOGRAPHY

PORTABLE APPLIANCE TESTING (PAT TEST)

Portable appliance testing (PAT) is the term used to describe the examination of electrical appliances and equipment to ensure they are safe to use. Most electrical safety defects can be found by visual examination but some types of defect can only be found by testing. However, it is essential to understand that visual examination is an essential part of the process because some types of electrical safety defect can't be detected by testing alone.

EARTH MOVING EQUIPMENTS

IQRA is one stop solution for construction equipments/machinery and heavy equipments inspection, with its most competence and experienced inspectors.

As a leading inspection body, we are able to offer qualified and expert support in construction equipment/machinery & heavy equipment inspection services including

Excavator, Backhoes, Skid Steer Loader, Skip Loader, Drill Rigs, Dump Trucks, Paving Vehicle and Dozer etc.

IQRA also provides its customers various visual and function inspection for the following equipment's and ensure the operators safety and site safety.

- **WELDING MACHINES /GRINDING MACHINE**
- **GENERATOR**
- **CUTTING/ BENDING / DRILLING MACHINE**
- **POWER TOOLS**
- **SPARK ARRESTORS**
- **EARTH PIT INSPECTION**
- **STORAGE RACK INSPECTION**

OCCUPATIONAL SAFETY TRAINING COURSES

OUR SAFETY COURSES :

- Working at height Safety
- General safety Training
- Hand tools safety
- Rigger Safety
- Certified Gas Tester
- Welding & Cutting operation Safety
- Electrical safety Training
- Confined Space Safety
- Work permits/ Risk assessment
- Excavation Safety
- Defensive Driving Safety
- Safe procedure for use of lifting gears
- Preparation of HSE plan / HSE manual
- Safety officer / Supervisor Safety course
- Occupational Noise Exposure Safety
- Job Hazard Analysis
- Hazardous/toxic material handling Safety
- Occupational Health & Environmental Safety
- Manual handling & material handling Safety Site
- Accident reporting & investigation
- Air compressor / Boiler Safety
- Heat Stress Safety
- SCBA Safety
- Tower crane operator Safety
- Mobile crane operator Safety
- Telehandler operator Safety
- Jackhammer operator Safety
- Welding operator Safety
- Scaffolding supervisor Safety
- Concrete pump operator Safety
- Wheel loader operator Safety
- Boom Loader operator Safety
- Lifting supervisor Safety
- Power tool operators Safety
- Flagman Safety
- Scaffolding Safety
- MEWP Safety
- Window cradle operator Safety
- Forklift operator Safety
- Excavator operator Safety
- Skid-steer loader operator Safety
- Backhoe loader operator Safety
- Drill rig operator Safety
- Abrasive wheel safety
- H2S Safety Training
